

BYKECAM™ Installation Instructions for bike racks

Thank you for your recent purchase of BYKECAM

Check box for all contents before starting installations

Designed to work on pedal bicycles or battery assist motor hub bicycles

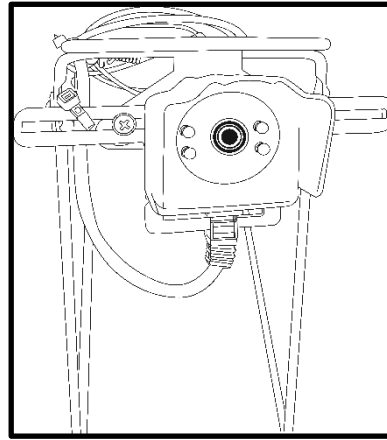

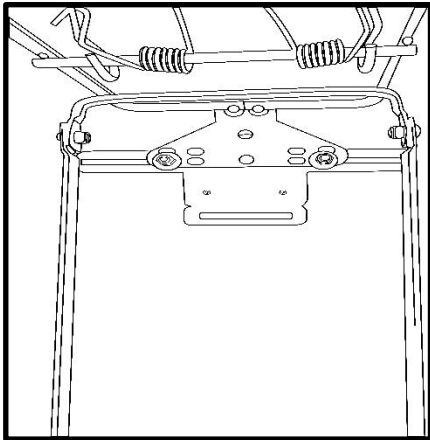

Charge the battery completely using the included charger before using BYKECAM™

Installation Steps

1. Find the holes on the back of your bike rack
2. Position and line up the holes with the slots of the BYKECAM bracket
3. Use the screw and nut hardware supplied to tighten the camera to your bike rack
4. Route the cable coming from the front of the monitor to the camera unit at the rear
5. Tie down the cable to the bike frame using tie wraps

Installation video can be found @ www.BykeCam.com or scan QR code

Keep travel key plugged when not riding or traveling with bike
