

# BYKECAM™ Installation Instructions for bike racks

Thank you for your recent purchase of BYKECAM

Check box for all contents before starting installations

Designed to work on pedal bicycles or battery assist motor hub bicycles up to 30mph

Note: Charge the battery using the included charger before using BYKECAM

## Installation Steps

1. Find the holes on the back of your bike rack
2. Position and line up the holes with the slots of the BYKECAM bracket
3. Use the screw and nut hardware supplied to tighten the camera to your bike rack
4. Route and install the cable coming from the front of the monitor
5. Tie wrap down the cable

Installation video can be found @ [www.BykeCam.com](http://www.BykeCam.com) or scan QR code

**Keep travel key plugged when not riding or traveling with bike**
